ABOUT MES

Mahatma Education Society (MES) was established in the year of 1970 with the objective of spreading education for all. MES is an epitome of vision linked irrevocably to national goals. Born in a time when education was deemed a service, it set about bringing social and economic changes through the proactive personal development of every child that came into its fold. The management of MES is headed by Dr. K. M. Vasudevan Pillai (Chairman and CEO) and Dr. Daphne Pillai (Secretary) with the team of experienced professionals from the field of Education. Today MES owns and manages over 48 institutions, from pre-primary to post graduation having more than 35000 students and 2000 teachers.

ABOUT PHCASC

Pillai HOC College of Arts, Science and Commerce, affiliated to the University of Mumbai, one of the reputed Institutions of learning and wisdom, was established in 2008 with the noble objective of providing fundamental learning and assuring higher education in semi-urban area of Rasayani. The goal of the institution is to education to all, irrespective of region, religion, caste, economic strate and academic performance thereby becoming the real catalyst for change in the society. Being guided by the inspring thoughts and encouraging words of the great visionary and CEO of MES, Dr. K. M. Vasudevan Pillai, the institution caters to about 1000 students in various disciplines such as B.A, B.Sc., B.Com, B.M.S, B.M.M, B.A.F, B.Sc (IT) and B.Sc. (CS).

AIM AND OBJECTIVE

Climate change is essentially a paradoxical subject. While the best scientific information is pointing to a clear threat to the future existence of humanity, the political and public responses to this challenge have been relatively weak. Many businesses accept that climate change is real but are waiting for signals from governments before making long-term investments in measures to address the threat. Meanwhile powerful forces, notably the polluting industries and fossil fuel sector, have deep vested interests in maintaining business-as-usual. Faced with these divergent views, researchers who is working or, have/has keen interest in climate change studies may face complexities for the clear understanding. Therefore, they must understand the scientific, political, economic and societal dimensions of a fast moving story, and make it relevant to diverse stake holders who may see climate change as unimportant or nonexistent. This conference aims to bring enthusiastic researchers, teachers, students and Entrepreneurs from various fields on a single stage, to identify and discuss interdisciplinary approach to address various scientific, environmental, social and psychological aspects of climate change. This meeting will also highlight economical strategies, sustainability and job creation under the theme of climate change. Certainly, This event will provide and excellent platform to inculcate awareness and other various aspects of climate change. Based on the availability of the recourses, a short information on the prediction and modelling of the climate change will also be provided.
